Cell Type

- | | | | | |
|---------------------------|----------------------------|-----------------------|-----------------------|---------------------------|
| ● Apoptotic-like | ● Forebrain/midbrain | ● Lens | ● Notoplate | ● Pronephric duct |
| ● Apoptotic-like 2 | ● Forerunner cells | ● Macrophage | ● Olfactory placode | ● Pronephric mesenchyme |
| ● Blastula | ● Germline | ● Myeloid progenitors | ● Optic | ● Rare epidermal subtypes |
| ● Blood | ● Goblet cell | ● Nanog-high | ● Otic placode | ● Rohon-beard neuron |
| ● Cement gland primordium | ● Hatching gland | ● Neural crest | ● Pancreas primordium | ● Secretory epidermal |
| ● Dorsal organizer | ● Heart | ● Neuroectoderm | ● Periderm | ● Skeletal muscle |
| ● Endoderm | ● Hindbrain | ● Neuroendocrine cell | ● Pharyngeal pouch | ● Small secretory cells |
| ● Endothelial | ● Intermediate mesoderm | ● Neuron | ● Placodal area | ● Spemann organizer |
| ● Epidermal progenitor | ● Involuting marginal zone | ● Non-neural ectoderm | ● Pluripotent | ● Tailbud |
| ● Eye primordium | ● Ionocyte | ● Notochord | ● Presomitic mesoderm | |
